EDUCATION

Worcester Polytechnic Institute, Worcester, MA

B.S., Computer Science **Sep 2016 – Dec 2019**

3.69/4.0 GPA. Senior thesis focused on applications of machine learning to social network graphs to predict future connections. Completed coursework in statistics, probability theory, machine learning, and computer architecture.

PROFESSIONAL EXPERIENCE

Grid AI, New York City, NY

AI Research Engineer **Aug 2020 –**

Core member of popular deep learning framework *PyTorch Lightning*. Created a package of metrics capable of efficient computation across multiple GPUs and server compute nodes. Continuing research within self-supervised learning of image representations.

Harvard Medical School, Boston, MA

Machine Learning Research Associate **Dec 2019 – Aug 2020**

Conducted research within the Image and Data Analysis Core. Created deep learning model to detect manipulation of microscopy images. Proposed a novel approach to biomedical image retrieval.

Analog Devices Incorporated, Boston, MA

Research Engineering Intern **May 2019 – Aug 2019**

Researched and implemented a state-of-the-art inertial navigation system for use in autonomous transportation. Assisted in other projects within the Autonomous Transportation group involving radar and lidar algorithms.

Part-Time Software Engineering Intern **Sep 2017 – Apr 2018**

Created software to analyze products' data sheets and highlight potential security risks. Results were then presented at an internal conference.

Software Engineering Intern **Jun 2017 – Aug 2017**

Wrote software for internet-connected agricultural sensors that is currently deployed in farms across the world.
